According to report
above obj. stayed
in same position
for 1 1/2 hrs - only apparent
when was an observed
zig-zagging movement
up and down.

Not very certain
evaluation.

ASTRO Check

NNNN

SHA for July 28 at 1230 = 308 (approx)

(FOR 29) 308 = 20 hrs. 30 min (SHA) = FULL MOON (Elev. approx 20 deg SE)

(FOR 28) 308 - 13 = 295 = Practically FULL MOON (Elev. 15 degrees)

Note elevation
given in B2. when
1st observation
made.

*ATTN Comment: Difficult to understand - yet object observed for 1 1/2 hours is given a description and elevations of practically the full moon - which is confirmed by Astro Tables and data. The "broader phenomenon" is well known See Bulletin 100 release 5 Nov 57. Although everything points to obj. being the Moon as it conclude positively because no direction or bearing given
